BACKGROUND
The University’s Academic Council expects that faculty members will participate in not only research and teaching activities but also academic advising duties. Faculty members will advise both graduate and undergraduate students, and participate in a larger community of advisors that include both the Whiting School of Engineering (WSE) Academic Advising staff and the department’s Academic Program Administration.

While academic advising includes helping a student plan to meet degree requirements, it also provides the potential to develop a meaningful mentorship relationship as you will help students navigate personal challenges and determine career paths.

The Mechanical Engineering “Academic Advising for Faculty” page offers extensive resources.

UNDERGRADUATE ADVISING
IN THIS DOCUMENT
1. Majors
3. Advising Timeline
4. Role of the WSE Academic Advising
5. Freshman Orientation

14. FERPA
15. Other Resources

1. MAJORS
Our two majors, Mechanical Engineering and Engineering Mechanics, have a base of mechanical engineering instruction but are otherwise distinct. Both majors have similar credit requirements for science, math, humanities, and senior design courses.

For the Class of 2022 and later
- **Mechanical Engineering** has 50 “Required Engineering” credits with specific mechanical engineering courses, plus 9 “Mechanical Engineering” elective credits, plus 9 “technical elective” credits in “STEM” type courses (science, technology, engineering, and math).

For the Class of 2021
- **Mechanical Engineering** has 49 “Required Engineering” credits with specific mechanical engineering courses, plus 9 “Mechanical Engineering” elective credits, plus 9 “technical elective” credits in “STEM” type courses (science, technology, engineering, and math).

See next page...
For the **Class of 2020**

- **Mechanical Engineering** has 51 “Required Engineering” credits with specific mechanical engineering courses, plus 9 “Mechanical Engineering” elective credits, plus 9 “technical elective” credits in “STEM” type courses (science, technology, engineering, and math).

2. **ADVISING MANUAL**

Take about an hour to read the Academic Advising manuals located on the [MechE Undergraduate Academic Advising webpage](#). It has a wealth of important information on degree requirements, course electives, policies, and resources to help both students and advisors.

3. **ADVISING TIMELINE**

The actions occur in roughly this order:

**Summer**

- Incoming freshmen work with the Whiting School Academic Advising office, in consultation with the department’s Academic Program staff to select courses and answer policy questions.
- The Whiting School Academic Advising staff will assign Faculty Advisors from the department for incoming freshmen.
- Students transferring from other Universities will work with the Whiting School Academic Advising office and the department’s Academic Program staff or Director of Undergraduate Studies to determine what courses will be accepted from the previous university. The department will determine which of those courses will be accepted in the degree program.
- Current students may occasionally ask for help via e-mail or a visit.

**Early Fall**

- Freshman Orientation occurs several days before the start of the Fall semester. Faculty Advisors will meet with freshmen for the first time. The Academic Program Manager will stand in for advisors who will not be on campus that day, as well as be available for questions from freshmen and advisors.
- Freshmen will work with the Academic Program Manager and possibly Faculty Advisors to create a four-year plan.
- Upperclassmen may ask the Academic Program Manager for a four-year plan checkup and otherwise ask academic policy questions.
- At any time, any student may contact his or her Faculty Advisors to ask policy and academic questions, as well as career and internship advice.

**Fall Semester**

- Some students will switch majors from or to Mechanical Engineering or Engineering Mechanics. They may switch Faculty Advisors for the new major. The Academic Program Manager will help those students create their four-year plans.
• Late-October or early-November - Advising Week – all undergraduate students will meet their Faculty Advisors.

Intersession
• Some students will switch majors from or to Mechanical Engineering or Engineering Mechanics. They may switch Faculty Advisors for the new major.
• Students may occasionally ask for help via e-mail or a visit.

Spring Semester
• The Academic Program Manager will certify degree eligibility for seniors intending to graduate.
• Late-March or early-April - Advising Week – all freshman, sophomore, and junior students will meet their academic advisors.
• At any time, any student may contact his or her Faculty Advisor to ask policy and academic questions, as well as career and internship advice.

4. ROLE OF WSE ACADEMIC ADVISING
The Whiting School of Engineering’s Academic Advising office oversees school-wide and university-wide activities and policy. Among their many duties, the Whiting School’s academic advisors assist incoming freshmen with course selection, recording external credit, and approve requests to take courses at other universities. They also will work with departments to help students in academic or personal distress. Visit the Whiting School Academic Advising page for additional information.

5. FRESHMAN ORIENTATION
New freshmen will gather just before the start of the Fall semester at our Mechanical Engineering Freshman Orientation, then meet with their advisors for the first time. Faculty Advisors will be asked to review their course selections to confirm that they meet their degree’s first semester requirements. The Whiting School Academic Advising office will have already reviewed the proposed selections to confirm this, but will ask the advisors to reconfirm and address any unusual situations or course exception requests.

6. DEGREE PLANS / CHECKOUT SHEETS
Undergraduate students will complete a “degree plan,” also known as a “four-year plan,” or a “checkout sheet” that will track the student’s progress in completing the degree. Students are strongly encouraged to work either with the Faculty Advisors or, in most cases, the Academic Program Manager to create a four-year plan, as students often wish to explore minors or a second major. The Academic Program Manager can assist with policy or requirement questions that arise about most majors and minors.

Checkout sheets for the two department majors are available on the Mechanical Engineering website’s “Academic Advising – Undergraduate” page.

7. ADVISING WEEK
While students are encouraged to visit their Faculty Advisors often, they are required to visit their advisors at least once during each of the Fall and Spring semesters during Advising Week. The University has set Advising Week to take place the week before course registration begins for the next semester.
The academic staff will help schedule meetings, as needed. For Faculty Advisors who will be on sabbatical or otherwise unavailable during Advising Week, the Academic Program Manager will act as advisor on the Faculty Advisor’s behalf.

CHECKOUT SHEET REVIEW
Your advisees should update their checkout sheets and email them to you prior to their Advising Week meeting. Do not meet with a student until you have received a copy of his/her updated checkout sheet.

Checkout sheets are available on the Mechanical Engineering Undergraduate Advising page.

You should carefully review your advisees’ checkout sheets during Advising Week to ensure each student is on track to graduate on time.

Particular attention should be given to each student’s choices of elective courses, as most problems related to not having enough credits to graduate on time are due to misunderstanding our requirements and policies for these courses.

COMMON SOURCES OF CREDIT CONFUSION
Here are tips for course policies that are commonly referenced. Read these before each Advising Week to refresh your memory.

ADVANCED PLACEMENT
Many students arrive at Hopkins having already earned course credits through satisfactory completion of Advanced Placement (AP) or International Baccalaureate (IB) exams. Some AP credits can substitute for courses required for the B.S. degrees. Visit the External Credits page of the JHU catalog for information.

LETTER GRADES
All courses that will count toward the degree must receive letter grades. Most intersession courses receive only S/U grades. As a result, most intersession courses cannot be used to meet B.S. degree requirements.

During Intersession, there are course trips offered in the Office of Study Abroad that are letter graded and often assigned a course area of H or S. These courses may count toward Humanities and Social Sciences requirements, as long as they are 3 credits or more.

In Spring 2020, in response to the COVID-19 pandemic, all undergraduate courses were grades with an S*/U* grading system where S* is equivalent to C- or higher. No GPA was calculated nor did the semester have an effect on students’ GPAs.

WAIVED COURSES DON’T EARN CREDITS
Depending of the success of a student’s Freshman Math Placement tests, which are taken the summer before matriculation, he or she may be waived from taking Calculus I and, possibly, other math courses. For example, a student may choose to waive Calculus I and begin the math sequence at Calculus II. No academic credit is given for waived courses. Students must still
earn the total number of credits in the curriculum (19 credits in Mechanical Engineering; 23 credits in Engineering Mechanics), regardless of class level begun.

Note: A student may also be excused from taking a course because he or she has earned AP credits for it. This, however, is different from having the course waived, because the student is awarded the course credits.

PHYSICS
Students earning AP Physics C credits are exempt from taking the equivalent physics courses.

- AP Physics C (mechanics) exempts students from EN.530.123 Intro to Mechanics I or AS.171.101 Physics I.
- AP Physics C (electricity and magnetism) exempts students from AS.171.102 Physics II.
- EN.530.124 Intro to Mechanics II is not exempted by any AP credit. All students must take this course. Note the one potential exception in the box below.

LABS MUST BE TAKEN EVEN WITH AP CREDIT
While the University does not require Physics labs, departments can require them, which Mechanical Engineering does. The students’ ISIS records and transcripts will show a waiver of the labs, which is confusing. Impress upon your AP Physics C-accredited advisees that they must take the labs.

Students starting as Mechanical Engineering or Engineering Mechanics majors...
- ...in the freshman fall semester must take EN.530.124 Intro to Mechanics II in the freshman spring semester.
- ...after the freshman fall semester should consult with their faculty advisor as to which course to take, either EN.530.124 Intro to Mechanics II or AS.173.111 General Physics Laboratory I.

LINEAR ALGEBRA and DIFFERENTIAL EQUATIONS
Students may take either of these options but must do so by the sophomore spring semester:

- AS.553.291 Linear Algebra / Differential Equations – 4 credits
- AS.110.201 Linear Algebra (4 credits) and AS.110.302 Differential Equations (4 credits) if they can work the additional four credits into their schedules. Note that AS.110.302 Differential Equations can be counted as a Technical Elective.

Students who receive waivers from the pre-admission Mathematics exam will still have to earn 19 or 23 credits as appropriate for their degrees. Taking Linear Algebra and Differential Equations separately can help meet those requirements.
STATISTICS
The 3-credit course EN.560.348 will no longer be offered after the Spring 2020 semester. The 4-credit course EN.553.310 or EN.5530.311 Probability and Statistics courses offered by the Applied Mathematics and Statistics department are automatically accepted for the degree. Other statistics courses must be approved by the faculty advisor.

HUMANITIES and SOCIAL SCIENCE ELECTIVES (H&S)
• Students must take six courses, at least three credits each from the Krieger School of Arts and Sciences. Exceptions can be requested from the Whiting School Academic Advising office for a block of 18 credits taken in less than six courses.
  ▪ Note that some “Practical Ethics” courses are grouped into pairs (2 credits + 1 credit) that are accepted as “one” three-credit course. See the course catalog for information.
  ▪ Up to one H&S course can be taken from the Whiting School of Engineering without requesting an exception approval, where the other five must be taken from the Krieger School of Arts and Sciences.
  ▪ Requests to take a second Whiting School of Engineering H&S course must be approved by the faculty advisor and recorded on a Course Exception Waiver form.
• Courses must have an “H” and/or an “S” credit area designation. This is a WSE requirement and cannot be waived by a student’s advisor.
• One course must be either Intro to Expository Writing (AS.060.100), Expository Writing (AS.060.113 or AS.060.114) or Intro to Fiction and Poetry (AS.220.105).
• At least six (6) H/S credits must be at the 300-level or higher.
• Credits for foreign language courses have additional requirements – see our Undergraduate Advising Manual for details.
• All requests for exceptions must be pre-approved by the Director of Undergraduate Studies and the Whiting School Academic Advising office (wseadvising@jhu.edu).

WRITING INTENSIVE COURSES
Section 5.3 of the advising manual describes the Writing requirement, as well as Distribution and Depth requirements for the Humanities and Social Science requirements.
• AS.060.100 Intro to Expository Writing, AS.060.113 or AS.060.114 Expository Writing, and AS.220.105 Introduction to Fiction and Poetry are the approved courses for our majors.
• Students need take only one H/S writing intensive course, as EN.530.403 Senior Design counts as the other writing course.

PEABODY STUDENTS and H&S
Please ask if your advisees are working toward a minor or major at the Peabody School of Music. Be sure that those students are aware of all requirements for both programs. Be particularly aware of Peabody courses that have H and S course areas and those that do not. The Whiting School will not allow students to count Peabody courses for H and S requirements that do not have either the H or S course area.
INTRODUCTION TO ENGINEERING / PROGRAMMING SUBSTITUTES

When a student transfers majors to Mechanical Engineering or Engineering Mechanics after the freshman fall semester, there are various options available to complete the introduction to engineering and introduction to programming course requirements. Visit the Intro to Computing / Intro to Engineering options sheet in the Mechanical Engineering “Declare or Transfer to Our Majors” page to view options.

COMPUTING

For the Class of 2022 and later, the introduction to computing requirement will usually be met with the new course EN.500.114 Gateway Computing - MATLAB, which will be taken in the freshman spring semester. This replaces the department’s EN.530.112 Intro to MechE Computing course.

Some students may take EN.500.112 Gateway Computing – JAVA to complete pre-requisites for the Computer Science or Robotics minors. This can be taken instead of EN.530.114, but students must then take the appropriate 1-credit “Bootcamp” computing course, EN.500.134 to receive instruction in the other language that they did not take in the 3-credit Gateway course.

MECHANICAL ENGINEERING ELECTIVES and TECHNICAL ELECTIVES

There are two types of electives in the Mechanical Engineering programs:

Mechanical Engineering electives are the following courses:
- Courses with course number prefixes “EN.530” and are at the .300-level or higher.
- EN.500.308 and/or EN.500.309 Multidisciplinary Engineering Design
- EN.520.495 Microfabrication Laboratory
- EN.580.451 Cell and Tissue Engineering
- EN.580.452 Cell and Tissue Engineering II

Technical Electives are any courses that carry a course area of E (engineering), Q (quantitative/math), or N (natural science) and are at the .300-level or higher. These could include Mechanical Engineering courses EN.530.xxx at the .300-level or higher, as well. The department will accept up to one computing course as a technical elective. See Sections 6.4 and 7.4 for details.

8. COURSE EXCEPTION WAIVERS

Students will occasionally request an exception to various degree requirements. Requests that are granted are recorded on a Course Exception Waiver form, which is available on the Mechanical Engineering “Undergraduate Academic Advising” page.

Anytime that you approve a deviation of any sort from the standard degree requirements (including counting Independent Research or Independent Study as an elective), you must complete this form. The form must explain the exception and the academic rationale behind the exception. In other words, there has to be a “good reason” for the exception.

Note that exceptions to the Humanities and Social Science courses must be pre-approved by our department and the Whiting School Academic Advising office, except when approving a second Whiting
School H&S course. Please read the Course Catalog carefully to ensure that the proposed exception is possible.

You and the student will sign the form and deliver it to the academic program manager, who will obtain necessary signatures from the Department Chair and the Whiting School Academic Advising office. If this form is not completed, the student will not be allowed to graduate until the item is resolved.

9. **RELEASING ADVISOR HOLDS**
   There is a wealth of important information on the Advisor Screen of SIS. You will use this to release a student’s Advisor Hold and access other information:

   1. Go to [https://sis.jhu.edu](https://sis.jhu.edu)
   2. Enter your JHED ID and password.
   3. Click on Advisor at the top of the screen.
   4. Click on Advisees → Advisee List to view your current advisees.
      - To release a hold on the advising page, click Release Hold.
      - To put the hold back on, click Apply Hold.
   5. You can click on the following links for additional student information:
      - Enrollments (add/drop activity)
      - Grades
      - Schedule
      - Alerts/Holds

10. **INDEPENDENT RESEARCH and INDEPENDENT STUDY**
    Students may wish to explore topics partially or not covered in coursework or expand their learning on a course topic. Independent Research is a course under the direct supervision of a faculty member in which a student identifies and proposes research work that creates new knowledge. Independent Study is the result of creating a course of study on an already established topic.

    - Up to three credits can be earned in any one semester, summer, or intersession, though only up to three credits of independent work can be counted toward the B.S. Mechanical Engineering degree as an elective.
    - Each credit should reflect 40 hours of work, which is unpaid.
    - Students taking three or more credits of undergraduate research are encouraged to present a research poster at the Johns Hopkins University’s Undergraduate Research Day, which is presented at the annual School Open House and Overnight Program (SOHOP) for admitted freshmen. Announcements will be sent in advance to arrange to submit the poster.
    - No distribution credits are attached to independent work, though your advisor can designate a distribution through a Course Exception Waiver form.

The Mechanical Engineering department recommends that a student have a cumulative GPA of at least 3.0 to request approval to conduct independent research or independent study.

Before embarking on a project, students must obtain pre-approval from their academic advisors by presenting a completed “Undergraduate Research, Independent Study, Internship, and Departmental Thesis” form available at the Registrar or from the Academic Program staff. Any research work performed without this preapproval will not be recognized and accredited.
11. MCAT
In rare instances, a student will also follow a pre-med track and will take the MCAT for medical school applications. The JHU Office of Pre-Professional Studies will advise the pre-med portion. There is a focus on psychology and sociology, as well as living systems, critical analysis and reasoning skills. Keep this in mind as students select H/S courses. Academic Program Manager Mike Bernard can assist with degree planning with pre-med.

12. CAREER ADVISING
Students often ask for advice about jobs, internships, graduate school, and connecting with industry contacts. Some students will want to pursue a mechanical engineering career and others will diversify their career choices in other engineering fields, consulting, finance, law, and medical professions. Currently, we depend on alumni, industry partners, and the Whiting School of Engineering to provide and distribute information about internship and job opportunities.

Advisors are encouraged to share their personal experiences of working as a professional, and otherwise can offer a variety of resources.

- The Mechanical Engineering Careers and Life page
- The Johns Hopkins Life Design Lab, formerly the Career Center.
- Fellow Mechanical Engineering faculty
- Academic Program Manager Mike Bernard – me-academic@jhu.edu or 410-516-7154

13. WHEN A STUDENT IS IN TROUBLE ACADEMICALLY OR PERSONALLY
If a student is having trouble in a class, the instructor is strongly encouraged to note this trouble in the Johns Hopkins “Starfish” system, which is included in the Blackboard system, the course assistance tool.

ACADEMIC TROUBLES
Starfish should be used to record concerns and note patterns to alert the Whiting School Academic Advising office, where they can intervene and assist with resources to help the student. Academic advisors will be notified when this occurs. They may meet with students to discuss the situation and offer resources to address academic or personal problems.

Blackboard
- Website
- Help and Instructions - Cheryl Wagner at 410-516-7181 or cwagner@jhu.edu.

Starfish
- Access Starfish on the Blackboard page for courses that you instruct.
- Help and Instructions - Emily Calderone at 410-516-9912 or starfish@jhu.edu.

PERSONAL TROUBLES
Occasionally, students may feel overwhelmed by the rigors of education, especially if coupled with outside stresses like health and family concerns. Johns Hopkins offers a host of resources where they can ask for and receive help.
If students need someone to listen, they are encouraged to talk to their academic advisors, Academic Program Manager Mike Bernard or Senior Academic Program Coordinator Kevin Adams. Sometimes, venting to someone may be all that is needed.

Sometimes, though, they may want or need to talk to someone who is trained to help people in distress. View these pages for information and hours:

- Recognizing and Helping Distressed Students
- Office of Student Life – for information on services, offices, events, and student groups
- Office of Student Disability Services – to get help with a physical or mental incapacitation, no matter how minor.
- Counseling Center – to get help with any emotional concerns, when feeling overwhelmed, and when needing mental health support in a caring environment.
- Sexual Assault Helpline
- Emergencies – call the Security office at 410-516-7777 or the Baltimore City Emergency at 911.

14. FERPA

The University expects everyone to follow its policy based on the Family Educational Rights and Privacy Act of 1974. This federal law restricts what information – particularly student grades – that can be released without a student’s written consent.

All new advisors must take a ten-minute tutorial before being assigned advisees. Visit My.JH.edu → “Education” icon → “myLearning” icon. Search for “FERPA Basics.”

15. OTHER RESOURCES

- The Mechanical Engineering “Academic Advising for Faculty” page.
