

RISE@APL

The Whiting School of Engineering, in partnership with the Johns Hopkins University Applied Physics Laboratory, is pleased to announce that applications are now being accepted for [RISE@APL \(Research Internships in Science and Engineering\)](#). Since this partnership was launched in 2014, participating students have had rewarding experiences working with mentors at APL and conducting research as paid scholars.

We are now seeking applications for the summer 2023 cohort of RISE@APL Scholars. If you are interested in learning more about this exciting and unique opportunity, I encourage you to attend this upcoming informational meeting.

At the event, last summer's scholars will share their experiences at APL. Following the formal program, there will be a poster session and open networking reception for current students, their APL mentors, and Hopkins engineering alumni. Additionally, representatives from APL and WSE will be available to answer students' questions about the application and selection process.

You can learn more about the program and its many benefits (including generous stipends and transportation to and from APL), as well as the application process and deadlines, on the [WSE website](#).

I look forward to seeing you on November 15.

Sincerely,

Ed Schlesinger

Benjamin T. Rome Dean
