

Assistant / Associate Professor Mechanical or Nuclear Engineering United States Naval Academy

Mechanical Engineering Department at the U.S. Naval Academy invites applications for one or more tenure-track positions with an anticipated start as early as summer 2023. Preference will be given to Assistant Professor candidates, but exceptional candidates at the Associate level will be considered. The department seeks individuals with expertise in areas of mechanical or nuclear engineering. Candidates should have a solid commitment to undergraduate teaching, to producing high-quality peer-reviewed research, and to mentoring a diverse group of students drawn from every congressional district and U.S. territory.

The United States Naval Academy (USNA) is a four-year undergraduate institution with a mission to prepare our students morally, mentally, and physically for commissioning as officers in the naval services. This is a 10-month federal excepted service position with a three-year initial academic appointment. Salary for this position will be commensurate with experience and qualifications. Application review will begin on **December 1, 2022**. For more information about this position and how to apply please visit the USNA position announcement at the link below.
