Grading Method Letter Grade Pass/Fail

Johns Hopkins University
Department of Mechanical Engineering
MSE Mechanical Engineering – Research Course Agreement

To count research toward the MSE Mechanical Engineering degree, students must register for EN.530.823 MSE Graduate Research for at least three credits and earn a letter grade of B- or higher. While one course grade can be graded C- or higher for the MSE Mechanical Engineering degree, it is best to aim for a B- or higher for all course work, including research. One credit of research typically requires 40 hours of work.

ACKNOWLEDGEMENT OF RESEARCH AGREEMENT

The opportunity to work with other researchers is a privilege. I understand that this research should be a top academic priority, both out of consideration for my research advisor's time and that others may be depending on my results.

I understand that research is open-ended, so the direction may change. I will consult with my research advisor and other involved researchers throughout this project to discuss changes in direction.

I understand that consistent communication with my research advisor is crucial to my successful completion. I will inform my research advisor of my progress as noted in the research expectations and deliverables on this form.
